Education

B. Tech, Computer Science and Engineering CGPA: 8.4/10 (5 th term)	Institute of Engineering & Management 2023-2027
Senior Secondary Education (XII, CBSE) Percentage: 92.3%	SAI International School, Bhubaneswar 2022
Primary Education (X, CBSE) Percentage: 93.4%	The Gurukul Nilokheri, Haryana 2020

Projects

Natural Disaster RAG Assistant *LangChain | FAISS | HuggingFace Embeddings | Groq (Llama 3.3 70B)*

- Built a **Retrieval-Augmented Generation chatbot** that answers natural disaster preparedness questions strictly from a curated PDF knowledge base, reducing hallucination risk by constraining responses to retrieved context.
- Implemented a **PDF ingestion pipeline** with recursive chunking and sentence-transformer embeddings, indexed in a FAISS vector store for **semantic search**.

AI-Powered Voice-Controlled Email Assistant *Python | Speech Recognition | Text-to-Speech | SMTP Email Service*

- **Developed an AI-powered Voice Email Assistant** using **Python, Google Gemini, and SpeechRecognition** to convert voice commands into professionally formatted emails with subject and body generation.
- **Integrated Language Detection, Text-to-Speech, and SMTP protocols** to enable multilingual voice interaction, audio feedback, and secure email delivery, providing a hands-free email communication experience.

Internships

AI & Machine Learning Intern — Sure Trust ProEd (Remote) *Ongoing | 2026*

- Worked on project-based AI/ML problem statements involving data preprocessing, exploratory analysis, model development, and result interpretation.

Artificial Intelligence Intern — UptoSkills (Remote) *Ongoing | 2026*

- Developed and fine-tuned prompts for generative AI models, applying prompt engineering techniques to build real-world LLM-based workflows.

Technical Skills

- Programming Languages: C++, Python, Java
- AI/ML & NLP: LangChain, scikit-learn, NLTK, TF-IDF, HuggingFace Datasets & Embeddings, FAISS
- Data & Visualization: Pandas, NumPy, Matplotlib, Seaborn
- Core CS: Data Structures & Algorithms, DBMS, Software Engineering

Achievements

- Awarded Best Squad Leader and Best Intern; State-Level Goalkeeper in football.
- Participated in Tata Technologies InnoVent hackathon.

Professional Summary

Final-year B.Tech Computer Science student with strong experience on building AI/ML and software applications, including a Retrieval-Augmented Generation (RAG) system, a multi-agent LLM pipeline, and a deployed NLP classification model. Proficient in Python, Java, and C++, with practical exposure to LangChain, scikit-learn, and LLM APIs. Seeking an entry-level Software Development or AI/ML Engineering role.
